**Classification:** UNCLASSIFIED  
**Caveats:** NONE

Good morning Ina,

The Corps normally reviews and accepts a correct and complete IA in two days. Coordinating this second West Lake IA has been slower than I have ever seen in 30 years. Perhaps you can help me resolve it.

I need to know if Region 7 has a specific district in mind to accept the second West Lake IA. The first was accepted by Kansas City District who transferred some of the work to Saint Louis District. Superfund work in Missouri is usually assigned to Kansas City District, which is very experienced with supporting EPA Superfund projects, but some of the proposed West Lake Landfill work is more reasonably suited to Saint Louis District.

Has Region 7 been coordinating the proposed second IA with one or both of these districts? Is it ok if we accept the assignment at Kansas City District, and execute the public affairs and on-site presence using Saint Louis District? Does the RPM agree with this approach?

I am sorry for the additional delay I caused. I was disabled most of last week, and unable to pursue a resolution.

Thank you for your patience and help,

Greg Jordan, PE

Marvene,

Does it take this long to get personnel information for an IAG?

Classification: UNCLASSIFIED  
Caveats: NONE

Ina - Received a brief message from Greg Jordan (HQUSACE) this morning that he is out of the office on sick leave.

In the USACE review process of the draft SOW for the new Westlake IA, I received a message regarding Page 4 (Task 2) that "Techical" needs to be revised to "Technical" (see attached highlighted correction on page 4). Since the SOW is still in draft form, can the correction be made on the final SOW sent to EPA IASSCWEST?

Thanks very much!
